Clinical Laboratory Scientist & Medical Laboratory Technician Review Seminars Directed Toward California Licensure

A review course in preparation for the California CLS and MLT licensing/certifying examinations
(This review course is not eligible for continuing education credit for current CLS, MLT, or CPT licensees)

Dora W. Goto, MS, CLS, MT(ASCP), CLS(NCA); Program Director

8:30 am – 6:00 pm (November 22 & 23, 2008)
UC Irvine Medical Center, Orange, CA

Sponsored in part by: Quest Diagnostics
John Muir Health
Genomic Health
Abbott Diagnostics
Bay Valley Medical Group

Objectives of review seminars: Review seminars developed and presented from an appropriate curriculum may provide guidance when preparing for the licensing/certifying examination (**such as ASCP and AAB exams**). Having better prepared candidates for licensure may increase the number of qualified individuals who pass the licensing examination and may be employed in the analysis of clinical specimens.

Purpose of collecting post examination test scores: CAMLT will be collecting post examination test status to help determine the efficacy of review seminars directed toward California licensure. The purpose of maintaining mock and post examination statistics is to continuously update curriculum reviewing the subject matter evaluated by the licensing/certifying examination and to determine if the curriculum developed will improve test scores of candidates for licensure.

Techniques: A curriculum will be presented for review seminars that will include the following topics:

Clinical Chemistry	Hematology	Mycology	Bacteriology
Serology/Immunology	Urinalysis	Virology	Parasitology
Immunochemistry	Quality Assessment	CA Laboratory Law	Safety/Specimen Collection

All topics will be presented as examination review two-day seminars. In addition, test strategies unique to the California licensing/certifying examination will be discussed. **Registrants will be asked to participate in a study (at no additional cost), which include a graded mock examination and the collection of post examination test status. Registrants are free to choose not to participate in this study and attend the seminar only.**

Seminar Registration Fee: \$175 for two days
(complete and return registration form to attend seminar)

Study Participation: no additional cost
